Languages & technologies

- Html5
- Css3
- Javascript ES6+
- ReactJs
- Git/Github
- AWS(Amplify Service)
- Netlify
- Redux

Soft Skills

- Quick Comprehensive learner
- Proactive
- Problem-solver mindset

Experience

2020/08 - Until now	Web developer / Web designer at Town Hall of Nogales	My functions were to redesign the webpage of the Town Hall giving it a user oriented experience allowing people to know more about the office procedures without the need attending in person this on the Covid-19 background, preventing contagion focuses. on the technical side the web was a reactjs based site with a mobile view and a low-speed network orientation which it's the usual speed of the local population.
2020/05 - 2020/07	Beta Tester for ThisCodeWorks on the Save Code Extension	My functions were mainly to test the Beta version of the Save Code Chrome Extension an interesting extension that allows the end user to save Code snippets easily by the advance of the project i started to contribute to it giving it design guidelines based on the ThisCodeWorks webpage so it became more friendly with the end user also helped to solve critical logic problems that appeared on the early versions.
