Work History

03-2016/Current: Freelance Computer Technician

- Provide onsite and remote support to end users on operating systems based on Windows, Linux and MacOS.
- Provide purchasing advice to end users and little companies on technology related purchases.
- Repairs on hardware level on desktops and laptops.
- Generate scripts for automating repetitive tasks such as dns changes and common software installs.

09-2014/02-2016: Mobile Network User Assist at Entel Chile

- My main duties were to provide guidance to end users on the use of the services provided by the operator, also if it was necessary i had to generate network issues tickets and provide the maximum possible of antecedents for an effective solution of the problem
- One of my mayor accomplishments was a cross platform report that helped to lower the input of calls by informing the L1 platform a mayor issue which affected around a 10% of clients on national level on escalated time
